EXPERIENCE

HG Infotech | Software Engineer | Bengaluru South, India | On-site | Feb 2025 – Present

Project: S2P Matrix - AI-Powered Source-to-Pay (S2P) Procurement Platform | Apr 2026 - Present

- Designed and developed enterprise procurement modules covering Vendor Management, RFQ, Quotation Management, Purchase Orders, Goods Receipt Notes, Invoice Processing, Payments, Reconciliation, Audit Trail, and ERP Console workflows.
- Developed scalable backend services using Python, FastAPI, SQLAlchemy, MySQL, and SAP HANA Cloud to support end-to-end procurement and supplier lifecycle management.
- Built responsive and data-driven frontend applications using React.js, JavaScript, HTML, CSS, and REST API integration.
- Implemented an AI-powered procurement chatbot with intelligent intent routing, conversation memory, business-rule processing, and real-time procurement data retrieval.
- Designed a modular LLM integration architecture supporting local AI models through Ollama and enabling future integration with OpenAI, Claude, and Gemini providers.
- Participated in SAP HANA Cloud migration, environment configuration management, API integration, testing, debugging, and production support activities.

Project: [Fastays.com](https://www.fastays.com) - B2C Travel Booking Platform (Flights, Hotels, Tours, Buses) | Feb 2025 - Mar 2026

- Designed & developed scalable backend microservices using Java, Spring Boot, MongoDB, and Microservices.
- Developed 5+ responsive and dynamic frontend modules using React, JavaScript, and API integration.
- Designed REST APIs with low latency and high throughput for real-time booking and payment systems.
- Implemented API Gateway to enhance inter-service communication, security, and performance.
- Implemented event-driven communication using Apache Kafka, improving system scalability, reliability, and fault tolerance.
- Integrated Third-Party APIs for real-time availability of flights, hotels, tours, and bus services.

Junior Software Engineer | Aug 2024 - Jan 2025

Project: Procurement Service Platform

- Contributed to full-stack application development using Java, Spring Boot, MongoDB, JavaScript, HTML, and CSS.
- Built internal modules to streamline procurement workflows across Sales, HR, and Finance teams.
- Reduced manual coordination efforts by 35% through process automation.
- Assisted in developing AI-assisted candidate matching and recruitment workflow features to improve hiring efficiency.

TECHNICAL SKILLS

- Programming, Frameworks & AI:** Java, Python, Spring Boot, FastAPI, JavaScript, React.js, REST APIs, LLM Integration, AI Chatbot Development
- Databases, Architecture & Platforms:** MongoDB, MySQL, Microservices, Kafka, SAP BTP, ERPNext
- Tools, Cloud & Practices:** Git & GitHub, Agile Methodology, AWS, CI/CD Pipeline, Debugging

EDUCATION

- B. Tech (ECE)** Mar 2021 - Jul 2024
Reva University | CGPA: 7.8
- Diploma (ECE)** Apr 2018 - Jan 2021
GPT Turuvekere | Percentage: 83%

TRAINING & CERTIFICATIONS

- Full Stack Web Development + DSA Trainee (6-month intensive program)**
- AWS Cloud Computing** – AWS Training and Certification
- Java Certification** – HackerRank
